TITLE: EXTRUSION DIE

INFORMATION DISCLOSURE STATEMENT

MAIL STOP AMENDMENT

Commissioner of Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Dear Sir:

Applicant wishes to bring to the attention of the Patent Examiner the reference listed on the enclosed Form PTO-1449 and attached thereto. This reference was cited in the corresponding European proceedings.

In the case of the nozzle shown in these two references, an external drive for the axial movement of the insert is implemented. However, this nozzle is not mounted onto a cold channel block.

The external drive consists of a lever 18 that effects the axial movement of the insert by means of a gear tooth drive.

However, the point at which force is applied by the lever is on one side, so that the stress on the insert is non-symmetrical, thereby leading to the expectation of possible tilting of the insert, but certainly of excessive wear of the insert.

Furthermore, the needle 22 can be screwed into the insert, in other words it is not an integral part of the insert, which is therefore complicated and difficult in production, whereby it

must furthermore be noted that the geometry of the insert (differential piston) also results in more complicated production.

A check in the amount of \$180.00 is enclosed to cover the fee for filing an Information Disclosure Statement (IDS). The Commissioner is hereby authorized to charge Deposit Account No. 03-2468 for any additional fees or credit any overpayment in connection with this IDS. It is respectfully requested that the foregoing IDS be incorporated into the official file of the present patent application.

Respectfully submitted,
Manfred DUFNER
